WORK EXPERIENCE

Redprint - Data Scientist | Buffalo, NY Aug 2026 - Present

- Analyzing workout, member, and NFC-tagged equipment usage data using Python and SQL, preparing datasets for personalized fitness insights and gym operations.
- Building and testing models for personalized workout recommendations and progress tracking, collaborating with engineers to integrate data features into the product.
- Developing dashboards and reports on member engagement and equipment utilization, translating findings into insights for gym operators and product teams.

ASM International - Data Science Intern | Cleveland, OH May 2026 - Aug 2026

- Engineered machine learning data pipelines for 500K+ scientific documents, boosting OpenSearch index coverage by 35% and reducing data quality errors to significantly improve AI-powered search accuracy.
- Developed the Mat-E Pro RAG chatbot backend using natural language processing and LLM-powered enrichment pipelines, enabling automated metadata extraction across 10,000+ materials science documents at scale.
- Implemented CI/CD pipelines in GitLab to automate end-to-end data engineering workflows, reducing manual deployment effort by 60% and enabling fully automated vector search content indexing and retrieval.

Youro LLC - Data Science Intern | Buffalo, NY Feb 2026 - May 2026

- Built ETL pipelines using Python and SQL for data wrangling and transformation of 2,000+ patient records, reducing data processing time by 35% and supporting AI-driven healthcare analytics workflows.
- Collaborated with 3 cross-functional teams to develop SQL transformations and statistical analysis workflows, cutting data delivery time by 45% and improving reporting accuracy for healthcare platform teams.
- Partnered with the CEO to conduct business intelligence analysis on 5+ healthcare datasets, delivering actionable findings that directly influenced 3 key product strategy and operational planning decisions.

PROJECTS

SaaS Revenue Retention Analytics Dec 2025 - Jan 2026

- Built SQL-based revenue models computing MRR, churn rate, LTV, and cohort retention across 10,000+ subscribers, translating raw subscription data into executive-ready dashboards and actionable business intelligence.
- Performed cohort and retention analysis identifying 3 high-risk customer segments accounting for 60% of churn, enabling data-backed revenue strategy and more targeted customer retention intervention plans.
- Conducted A/B testing with statistical significance testing across 4 product experiments, validating rollout decisions that reduced iteration risk and improved product experiment success rate by 25%.

Rideflow Analytics Apr 2025 - May 2025

- Engineered a machine learning pipeline with time series forecasting on 3.5M+ NYC taxi trips, cutting ETL time by 40% and delivering hourly demand insights to 50+ daily users.
- Designed a normalized schema on AWS RDS with optimized SQL indexes, improving query latency by 25% and enabling real-time monitoring via a Streamlit dashboard for 50+ daily users.
- Streamlined data engineering workflows on AWS Glue and Athena processing 3.5M+ records daily, reducing pipeline overhead by 40% and ensuring data freshness for downstream machine learning model training.

Sentiment Wars Jan 2025 - May 2025

- Orchestrated an NLP and deep learning sentiment analysis pipeline across 50K+ text samples, benchmarking 5 LLM versus ML models to identify the most accurate and production-ready classification approach.
- Fine-tuned DeBERTa-v3-base with feature engineering to achieve 93.5% accuracy, outperforming DistilBERT and XGBoost by 8% and setting a new model evaluation benchmark across sentiment analysis datasets.
- Implemented MLflow experiment tracking across 30+ model runs to centralize evaluation metrics, boost reproducibility, and accelerate model comparison cycles by 30% throughout the complete development pipeline.

EDUCATION

University at Buffalo - State University of New York Buffalo, NY
Master of Science in Data Science Aug 2024 - Dec 2025

Savitribai Phule Pune University - Dr. D.Y. Patil Institute of Engineering, Management and Research Pune, MH
Bachelor of Technology in Computer Engineering and Minor in Data Science Aug 2020 - May 2024

SKILLS

Programming: Python, SQL, R, Pandas, NumPy, Scikit-learn
Data Analysis & Visualization: Statistical Modeling, Cohort Analysis, A/B Testing, Hypothesis Testing, Tableau, Power BI, Matplotlib, Dashboard Development
Cloud & Data Infrastructure: AWS, ETL Pipeline Design, Data Modeling, Schema Optimization, CI/CD, GitLab, Docker
Machine Learning & Experimentation: Model Training & Evaluation, Feature Engineering, Cross-Validation, Hugging Face Transformers, DeBERTa-v3, MLflow
Tools & Additional Technologies: Git, Jupyter Notebook, Streamlit, Excel, Hadoop, PySpark, Databricks, Snowflake, MongoDB, NoSQL, MATLAB, Mathematical Optimization Models

CERTIFICATIONS

IBM Data Science | McKinsey.org Forward Program | Databricks Fundamentals | Google Data Analytics Specialization
